

2020/21 Clarification from Technical Committee and Sport Director

Question and Answer 2020/21 N° 2

Single&Pair Skating

Step Sequence

**Question:**

What happens if during the execution of the Step sequence the skater/pair execute a spin with more than three revolutions?

**Answer:**

If this happens in the Short Program the spin is ignored as an element by the Technical Panel, but will force the Judges to reduce GOE by 1 grade

If this happened in the Free Skating the spin will be considered as an element, called by the Technical Panel.

In both programs this does not influence the determination of Level of difficulty of the Step sequence.
